

A FRAMEWORK FOR TRANSPARENCY AUDIT

The RTI Act under section 4 provides a comprehensive framework for promoting openness in the functioning of the public authorities.

While Section 4(1) (a) provides a general guideline for record management, so that the information could be easily stored and retained, the sub-sections b, c and d of Section 4 relate to the organizational objects and functions. Sub-sections (b), (c) and (d) of Section 4 of the RTI Act and other related information can be grouped under six categories; namely, 1-organisation and function, 2- Budget and programmes, 3- Publicity and public interface, 4-E. governance, 5-Information as prescribed and 6. Information disclosed on own initiative.

The matrix mode of management is adopted in the research activities which provides devolved responsibilities for effective implementation of multidisciplinary/ interdisciplinary programmes. For administrative purposes, the Institute has identified three research divisions and one section with strong support of central facilities and computerized administrative set up. Director is the Head of the Institute, supported by administrative and financial wings. To strengthen the local

		<p>decision making and research monitoring, Research Advisory Committee, Institute Management Committee, Institute Research Committee and PME Cell play a vital role through periodical meetings.</p>	
		<p>2. Any other details- The genesis, inception, formation of the department and the HoDs from time to time as well as the committees/ Commissions constituted from time to time have been dealt.</p> <p>ICAR-National Institute of Veterinary Epidemiology and Disease Informatics (NIVEDI), (Formerly, Project Directorate on Animal Disease Monitoring and Surveillance, PD_ADMAS) under the Indian Council of Agricultural Research (ICAR), a pioneer research institute in veterinary epidemiology is carrying out disease surveillance, monitoring and analysis of livestock diseases in India. The AICRP on animal disease monitoring and surveillance (AICRP_ADMAS) initiated by the ICAR, made a humble beginning during the VII five-year plan and became fully functional in 1987 with the establishment of four Regional Research Units (RRUs) at Bengaluru, Hyderabad, Pune and Ludhiana. The Central Coordinating Unit (CCU) was established at the Institute of Animal Health and Veterinary Biologicals, Bengaluru to coordinate the research activities of the regional units. In the VIII plan, the institute was strengthened with the support of ICAR and European Union by taking up the major responsibility under National Project on Rinderpest Eradication (NPRE) involving 32 state-level diagnostic/disease investigation laboratories in the country. On 1st April 2000 (during the IX plan), the CCU was given the status of Project Directorate and named 'Project Directorate on Animal Disease Monitoring and Surveillance (PD_ADMAS)' with ten collaborating units under the AICRP_ADMAS component. In the X and XI Five-year plan period, five more collaborating units were added for providing impetus to a nationwide animal disease monitoring and surveillance. Appreciating the contributions made by the Directorate to the country's livestock health sector and the need to strengthen the effort, the council rechristened PD_ADMAS as 'National Institute of Veterinary Epidemiology and Disease Informatics (NIVEDI)' on 25 th October 2013 (XII plan period) with its exclusive campus at Bengaluru. Further, during the same plan period, 17 additional collaborating units covering other states were added under the AICRP_ADMAS component totalling 31 collaborating units for providing the needed impetus to a strong nationwide animal disease monitoring and surveillance network. On 9th January, 2015, NIVEDI's newly constructed administrative building and Biosafety Laboratory (BSL-2) were dedicated to the nation by Shri Radha Mohan Singh, Hon'ble Union Minister for Agriculture, New Delhi in the presence of Shri D.V. Sadananda Gowda, Hon'ble Minister of Law and Justice, GOI and Shri T. B. Jayachandra,</p>	Fully Met

		<p>Hon'ble Minister for Law, Justice & Human Rights, Parliamentary Affairs and Legislation and Animal Husbandry, Govt. of Karnataka and Dr. S. Ayyappan, Secretary DARE and Director General, ICAR. The centralized administrative and laboratory complex of the institute is located in a sprawling campus at Yelahanka, Bengaluru. During 2018-19, the newly constructed Training cum Farmers' Hostel and Laboratory Block was inaugurated by Hon'ble Dr. Trilochan Mohapatra, Secretary (DARE) and Director General (ICAR) in the presence of Dr. Joykrushna Jeena, DDG (AS) and Dr. Ashok Kumar, ADG (AH) on 30th June 2018. From April 2021 onwards, National Animal Disease Epidemiology Network (NADEN) was established as an internal network of laboratories of ICAR-NIVEDI with existing 31 laboratories and it is envisaged to increase the centers to forty-plus collaborative centres in future, which are involved in animal disease epidemiology across every state of India. The network came into existence after the closure of AICRP on ADMAS on 31st March 2021 by the council. ICAR - NIVEDI, a pioneer research institute has been entrusted to conduct R&D in the field of veterinary epidemiology and surveillance of economically important livestock diseases in the entire country, its role is extremely pivotal for developing models for animal disease forewarning, forecasting, economic impact, risk assessment, and need-based animal disease diagnostics. The institute has developed various technologies covering both products and processes and some of them are marketed and/or patented/copyright protected, which are being utilized by various institutes/ organizations and different stakeholders in the country. The role of this institute in the eradication of Rinderpest disease in India and the development of the National Animal Disease Referral Expert System (NADRES) - interactive software for forecasting are noteworthy. The institute conducts various training programmes related to basic epidemiology, sampling frame and sampling techniques, outbreak investigation, research methodologies, and disease diagnosis protocols for various stakeholders associated with animal healthcare. Overall, NIVEDI has been proving its worthiness to the Indian animal health sub-sector covering critical gaps in diagnostic techniques, animal disease modelling, economic impact assessment and analysis of animal diseases, and human resource development in the form of skill development and empowerment, capacity building programmes etc. Further, NIVEDI envisions to provide newer direction to undertake in-depth R & D activities on the epidemiology of emerging and re-emerging, transboundary animal diseases to others involved in the sub-sector in the country, leading finally to prevention, control and eradication of the diseases for achieving animal welfare and safer animal- human interface under one health approach.</p> <p><u>National Animal Disease Epidemiology Network (NADEN)</u></p> <p>The National Animal Disease Epidemiology Network (NADEN) is a newly established network</p>

of laboratories, which are involved in animal disease epidemiology, across every state of India. The network came into existence after the closure of All India Coordinated Research Project on Animal Disease Monitoring and Surveillance (AICRP on ADMAS) on 31st March, 2021. As an internal network, ICAR-NIVEDI, plans to function with forty plus collaborative centers, as compared to existing 31 centres of AICRP_ADMAS. NADEN includes 6 Regional Disease Diagnostic Laboratories (RDDLs), 6 AQCS (Animal Quarantine and Certification Service), a center from Ladakh and an additional center each from the state of Uttar Pradesh, Rajasthan in addition to existing 31 centers. The focus of NADEN would be on the understanding the nationwide animal disease epidemiology to better inform control strategies.

Objectives

- To participate in R & D in animal disease epidemiology and informatics by collecting/ generating and collating livestock disease data and systematic outbreak investigation.
- To analyse disease data for risk mapping, epidemiological trends, forewarning for taking appropriate intervention strategies for disease control
- To undertake sero epidemiological studies
- To devise epidemiological solutions for effective control of animal diseases.

Mandates

- Strengthening of National Animal Biological Repository
- Effective updating of NADRES with active disease data, climatic and non-climatic factors
- Surveillance of diseases/pathogens in domestic companions, laboratory and wild animals
- Analysis of economic losses due to animal diseases and impact of control measures adopted for their management.
- Sero-monitoring of animal diseases based on strategic sampling
- Investigation of endemic, emerging and re-emerging animal disease outbreaks using innovative technologies.
- Working with all stakeholders in the public and private domain for the welfare and health care of animals.
